siberninja

COMPANY PROFILE

Siber Ninja

Trusted Offensive Security Partner

Siber Ninja is a specialized offensive security partner trusted by industry leaders worldwide.

Siber Ninja

Siber Ninja is a specialized offensive security partner trusted by industry leaders worldwide. We deliver expert-led penetration testing, secure SDLC & DevSecOps consulting, instructor-led training, and AI-powered security platforms.

Our Focus

- Realistic adversary simulations and deep-dive assessments
- Business-aligned, developer-ready insights
- Senior-led delivery backed by global research leadership (DEF CON, Black Hat)

Key Services

Security Consulting

- **Web & API Penetration Testing** – Manual testing and exploit chaining in modern apps
- **Mobile App Testing** – Static/dynamic analysis for iOS/Android & backend APIs
- **Network & Infrastructure Testing** – Internal/external assessments, privilege escalation
- **Red Teaming** – Goal-driven attack simulation for detection & response evaluation
- **Secure Code Review** – Manual + automated review for early-stage flaw detection
- **Thick Client Testing** – Security assessments for desktop & hybrid applications

Security Program & Management Consulting

- **Application & Code Security Program Design** – Design and scale AppSec programs and secure SDLC.
- **DevSecOps & CI/CD Architecture Implementation** – Integrate security into CI/CD pipelines.
- **Security Policy & Standards Development** – Develop secure coding policies and standards.
- **Security Maturity Planning (e.g. BSIMM, SAMM)** – Plan and improve security maturity.
- **Threat Modeling & Architecture Risk Analysis** – Identify and assess architecture-level risks.

Instructor-Led Training

- **Offensive Security Workshops** – Web, recon, exploitation, VoIP, static code analysis
- **Secure Development Training** – Secure coding, OWASP Top 10, API hardening
- **Custom Training** – Tech stack & project-specific modules

Siber Ninja Security Platform

- **Unified AI-Powered Platform:** PTaaS, DAST, SAST, MAST, SCA, secret & network scans
- Continuous Asset Discovery with context-aware risk scoring
- CI/CD Integration via APIs & webhooks

Why Siber Ninja?

- **One trusted partner** for consulting, training, and automation
- **Proven track record** with 500+ successful engagements
- **Real-world attacker mindset**, not checkbox testing
- **Actionable results** mapped to business and engineering needs
- **Ongoing support** to scale and evolve your security posture
- **Recognized experts** shaping the future of cybersecurity
