PLATFORM DATASHEET

Siber Ninja PTaaS

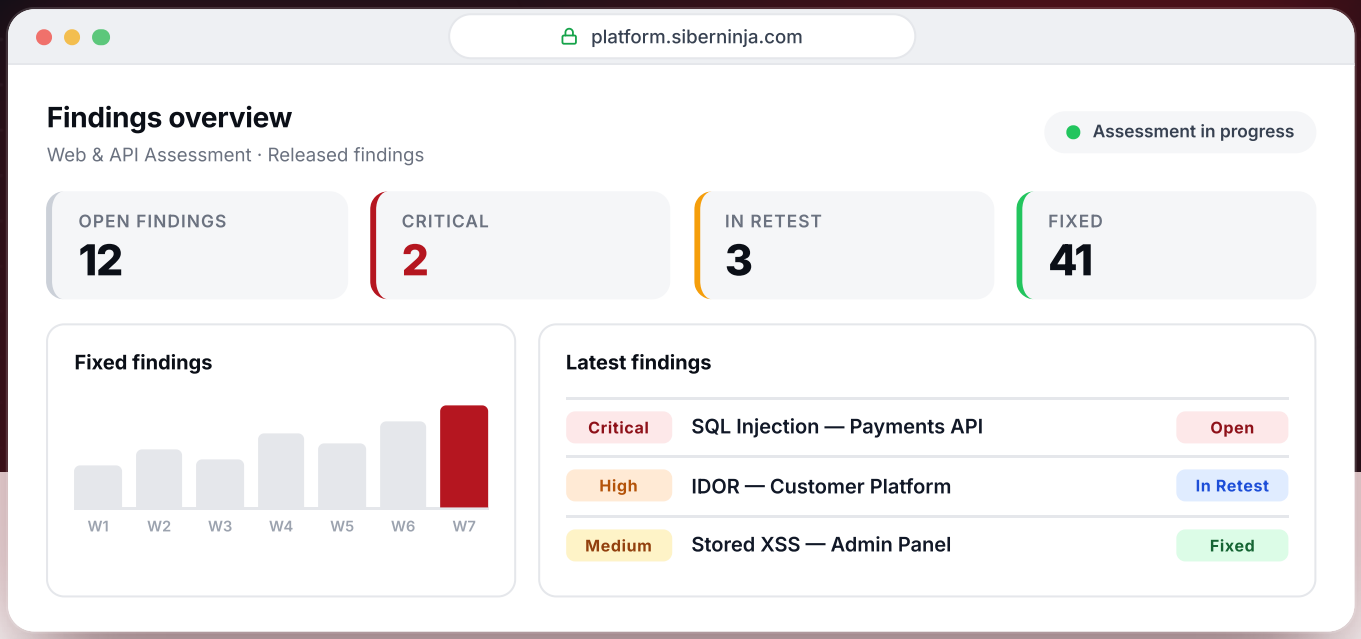

Penetration Testing as a Service

Expert-led penetration testing, managed in one secure workspace.

PTAAS / PLATFORM DATASHEET

Expert-Led Penetration Testing. Managed in One Secure Workspace.

From scoping and test delivery to findings, remediation and fix verification.

Illustrative platform view · sample data

PENETRATION TESTING AS A SERVICE

Senior-led testing, structured collaboration and clear visibility across every engagement.

EXPERT-LED TESTING

Hands-on security assessments performed by Siber Ninja specialists.

CUSTOMER VISIBILITY

Track projects, assessments, schedules and released findings.

REMEDIATION & RETESTING

Coordinate fixes and request verification of remediated findings.

FLEXIBLE ENGAGEMENTS

Single-project assessments or annual person-day testing programs.

SECURITY TESTING, UNDER CONTROL

A service-led approach — not another standalone scanning tool.

Siber Ninja PTaaS combines the depth of traditional penetration testing with a dedicated customer platform, helping security and engineering teams reduce coordination overhead and stay informed throughout delivery.

SERVICE OVERVIEW

Expert-led assessments. A simpler way to manage them.

Siber Ninja PTaaS is a managed penetration testing service supported by an online customer workspace. Our specialists conduct authorized assessments; customers gain a practical way to request work, follow progress and collaborate on remediation without relying on long email chains.

How PTaaS works

01 — 02 — 03 — 04 — 05

REQUEST & SCOPE

Agree objectives, assets, access and testing boundaries.

PLAN & PREPARE

Coordinate dates, responsibilities and prerequisites.

TEST & REVIEW

Execute expert-led testing and technical quality review.

REPORT & REMEDIATE

Deliver approved findings and track corrective actions.

VERIFY & CLOSE

Request targeted retesting and capture verification results.

What your team can do on the PTaaS platform

Test requests & scoping

Submit new testing and follow-up requests with project context and preferred dates.

Projects & assessments

Review your project portfolio, assessment history, delivery status and schedules.

Findings & remediation

View released findings with severity and technical detail, and track remediation updates.

Fix verification

Request validation for a specific finding or an assessment, with fix details and verification scope.

Capacity tracking

Monitor contracted, consumed and remaining person-days where a testing pool applies.

Collaboration & history

Exchange assessment-related comments and follow the history of requests and updates.

Security testing coverage

Coverage is tailored to each approved scope and may include:

Web & API · Mobile · Network & Infrastructure · Thick Client · Cloud · Secure Code Review

Engagements are delivered within an agreed scope and testing window. Only reports and findings approved for customer release are visible on the platform.

Scope & Scheduling — REQUESTS, SCOPE & TARGET DATES

Findings & Remediation — SEVERITY, EVIDENCE & PROGRESS

Fix Verification — TARGETED RETESTS

Capacity Tracking — PERSON-DAY USAGE

ENGAGEMENT MODELS

Flexible delivery built around your testing needs

Whether you need an individual assessment or a structured annual security testing program, Siber Ninja adapts scope and delivery to your organization.

PROJECT PENTEST

Scoped engagement

Expert-led testing of a defined application, system or environment. Includes agreed reporting and coordinated follow-up; platform access can accompany the engagement.

CONTINUOUS PTaaS

Annual testing program

A planned portfolio of assessments supported by a person-day pool, schedule visibility, repeat testing and coordinated remediation activities.

ENTERPRISE PTaaS

Tailored program

A customized multi-team, multi-scope testing arrangement with dedicated coordination and reporting arrangements defined by the service agreement.

What sets Siber Ninja apart

Senior practitioner-led

Security testing led by experienced consultants, with methodology grounded in real-world adversary techniques.

Actionable security outcomes

Clear findings, supporting context and developer-friendly remediation guidance.

Continuity across engagements

Historical testing, verification and capacity information can be followed within one customer workspace.

Built for security-critical teams

Experience supporting organizations across finance, telecommunications, commerce and public services.

About Siber Ninja

Siber Ninja is a specialist cybersecurity consultancy and technology partner founded by experienced security researchers and practitioners. In addition to penetration testing and PTaaS, our portfolio spans adversary simulation, application and cloud security, security program advisory and professional training.

PLAN YOUR NEXT PENETRATION TEST

Request a scoped assessment or discuss an annual PTaaS testing program.
